NSLDS Date Entered Repayment Report (DER001)

July 26, 2002

1.0 Date Entered Repayment (DER001) Report

The *Date Entered Repayment (DER001)* report allows school users to enter a date range and receive a list of student borrowers with loan history who are scheduled to go into repayment during the specified date range. Borrowers returned will be in current attendance at the requestor's school. The information is available in a formatted report or an extract file. Schools receive the report via their SAIG mailbox. Additional hints for printing the report in Microsoft Word format are available in the Report List Help page.

This section contains extract file layouts that list the header, detail, and trailer records for the Date Entered Repayment extract file. Each table contains the position, the data element name, description, field format, and length. The Output file consists of one Header record containing header information, one Select record containing the selection criteria, and Detail records containing Student and Loan information for individuals matching selection criteria. The following is a detailed description of the record layouts.
