

**Table 2**  
**Student Identifier Match Logic:**  
**Data Provider Edit Changes**  
**Action Plan Update**

No.	NSLDS Error	Comments/Resolutions	Implementation
7	<p>Field Code: 21</p> <p>Field Name: Student Social Security Number</p> <p>Error Code: 408</p> <p>Error Message: Student SSN currently used by another Student</p>	<p><b>Resolution 1</b></p> <p>NSLDS will move existing loan(s) and borrower(s) on the database to a pseudo SSN when:</p> <ol style="list-style-type: none"> <li>1. There are no open overpayments.</li> <li>2. All the loans on the database are from another single data provider and have been in a closed status for three or more years.</li> </ol> <p>Note: Additional analysis will be done after implementation of initial edit changes to determine if the time period can be reduced from three years to a shorter period, and/or the closed loans could be from multiple data providers.</p> <p><b>Resolution 2</b></p> <p>Data Provider can always report using same identifiers even if another data provider has changed the DOB on NSLDS.</p> <p><b>Resolution 3</b></p> <p>When a default value for DOB is on the submittal file and the DOB on NSLDS is a real date, NSLDS will consider it a match as long as the name meets our current criteria. When a default value for First Name (i.e. NFN) is on the submittal file, NSLDS will consider it a match as long as the DOB meets our current criteria. If the submittal file contains default values in both the DOB and First Name fields, NSLDS would not consider it a match.</p>	December 5, 2000
