## 1.0 NSLDS Teacher Loan Forgiveness Extract File Layout (GATLF1)

The *Teacher Loan Forgiveness Report (GATLF1)* provides GA users with detailed student and Teacher Loan Forgiveness (TLF) information as reported by FFEL data providers. The output produced includes student identifiers (SSN, First and Last Names and Date of Birth), as well as TLF information (TLF Type, Paid Date, Submission Date, TLF Amount, TLF Source, Student's State of Application, Lender Code and TLF Totals). The report parameter fields containing asterisks (\*) select all records by default unless otherwise specified. The information is available in a formatted report or extract file. Additional hints for printing the formatted report in Microsoft Word are available in the Report List Help page. Extract file layouts are available at <http://www.ifap.ed.gov>. GA users receive the processed data via the SAIG mailbox associated with the NSLDS User ID requesting this report

This section contains extract file layouts that list the header, details, and trailer records for the Teacher Loan Forgiveness batch request file produced. Each online extract request is used to generate one header record, one or more detail records, and one trailer record. Each record layout table contains the position, the data element name, description, field format, and length.
