CPS Web Applications
Demo System

Welcome to the Department of Education's CPS Web Applications Demo System

This Web site is brought to you as part of the U.S. Department of Education's efforts to make its processing systems available to the financial aid community in a demonstration environment. This will allow users to become familiarized with the CPS Web Applications products available to federal financial aid applicants. This site offers all the functionality/features of the production site.

However, 2001-2002 applications are not available on the Demo system. The submitted applications are not processed and the data is deleted daily from the demo server. Processes that depend on historical data such as renewal applications, correction applications, SAR duplicate requests, application status check and electronic signature submissions have been assigned an assortment of preloaded test data. These student IDs and PINs are given [below](#).

Printed signature pages include a test sample watermark and should **NOT** be mailed to the processor. The demo signature page is **NOT** accepted or processed. Also, an estimated EFC is **NOT** calculated after an application is submitted. The EFC value is always 99999 for any test case on the fafsademo site.
