Electronic Data Exchange (EDE)

2021–2022

U.S. Department of Education

Change History Table

The Change History table is updated each time the *Electronic Data Exchange (EDE) Technical Reference* is modified, providing you with a cumulative list of revisions made to the document.

When the *EDE Technical Reference* is modified after the initial release, the footer is updated to include the revison date. For example, if a change is made to page 3-24 in June 2020, the footer on that page will show "Rev. 6/20."

Date	Page(s)	Changes/Notes
5/20		Spring release of the *EDE Technical Reference*, including sections 3 (Record Layouts) and 4 (Processing Codes).
6/20		Complete *EDE Technical Reference* released, including the cover, Change History Table, Section 1 (Overview), Section 2 (EDE Processing), Section 3 (Record Layouts), Section 4 (Processing Codes), and Section 5 (Printing). We will no longer describe changes to the Spring release in the "Overview" section; instead, the substantive changes will be described in this table.
7/20	4-49 through 4-52	In the Field Name and Position Cross-Reference table we updated the ISIR start and end positions for SAR and FAFSA #s 38 through 42, 43.a through 43.f, and 44.a through 44.i.
7/20	4-59 through 4-62	In the Field Name and Position Cross-Reference table we updated the ISIR start and end positions for SAR and FAFSA #s 86 through 90, 91.a through 91.f, and 92.a through 92.h.
12/21	3-60	Updated valid value of 5 from "SSN, name, DOB match with date of death" to "SSN, name, DOB match with death indicator" in the Parent 1 and Parent 2 SSN Match Flag fields.
12/21	3-61	Updated the description for the Blank value for the SSA Citizenship Flag field after the "or" from "No match conducted if SSN Match Flag equals 8 or Blank" to "No match conducted if SSN Match Flag does not equal 4" Updated valid value of 5 from "SSN, name, DOB match with date of death" to "SSN, name, DOB match with death indicator" in the SSN Match Flag.
12/21	4-22	Updated Changes column for Parent 1 SSN Match Flag, Parent 2 SSN Match Flag, SSA Citizenship Flag, and SSN Match Flag fields.
12/21	4-38	Updated the note to include the change to reject code 8.
12/21	4-40	Updated Reject Reason 8 description from "SSN match with Date of Death" to "SSN match with death indicator"

Preface

The *Electronic Data Exchange (EDE) Technical Reference* is designed to meet the reference needs of programmers and data processing staff who want to incorporate electronic Free Application for Federal Student Aid (FAFSA®) and correction functionality into their institutional systems. This technical reference includes information about record layouts, required edits, printing assistance, and reject messages that are applicable for electronic FAFSA records, Institutional Student Information Records (ISIRs), electronic corrections, and signature records.

The information in this technical reference can assist you in developing your own software or creating bridges between your own mainframe software systems and the EDExpress for Windows PC software. We also explain how you can create bridges between your systems and selected Web site functionality provided by Federal Student Aid for sending and receiving FAFSA data.

The remainder of this section provides the following:

- An overview of the EDExpress and EDconnect software products, which you can use in combination with (or in place of) institutional systems you develop to exchange information with Federal Student Aid's data processors

- A description of Central Processing System (CPS) input and output data files

- An overview of new and modified items in the 2021-2022 version of the *EDE Technical Reference*

Software Products

To facilitate electronic data exchange, the U.S. Department of Education (ED) provides three software products free of charge to EDE participants: EDExpress for Windows, EDconnect, and TDClient.

EDExpress for Windows

EDExpress is a financial aid management software package that ED provides to Title IV financial aid administrators (FAAs). With EDExpress, you can manage Title IV student financial aid application data, package awards, and exchange origination and disbursement data with the Common Origination and Disbursement (COD) System for William D. Ford Federal Direct Loans (Direct Loans), Federal Pell Grants, and the Teacher Education Assistance for College and Higher Education (TEACH) Grants.

FAFSA and ISIR correction entry in EDExpress uses embedded browser technology to provide an interface with the FAA Access to CPS Online Web site (faaaccess.ed.gov). You submit the data through the Web interface, and processed results are returned to your Student Aid Internet Gateway (SAIG) mailbox, also known as a destination point, which you can then import into EDExpress.

Using this technical reference, you can create files of FAFSA data in the same format that the FAA Access to CPS Online interface uses to send data to the CPS. Some schools and agencies choose to send the data using EDE and import resulting ISIR data into EDExpress for storage purposes. Then they can also use EDExpress data management tools and report functionality.

To enroll for access to the FAA Access to CPS Online Web site, go to the SAIG Enrollment Web site at fsawebenroll.ed.gov.

EDconnect

EDconnect is a Windows-based file transfer protocol (FTP) program that enables users to send and receive Federal Student Aid information electronically. Users collect data on their PCs or computer systems and transmit the collected data in batches through the SAIG using EDconnect. The appropriate Title IV application system receives the data, processes it, performs any required database cross-referencing, and returns the processed data to the user's SAIG mailbox, where it can be downloaded to the user's PC or system with EDconnect.

TDClient

Transaction Delivery Client (TDClient) software is used to send and receive FTP data transmissions securely over the Internet using Federal Information Processing Standards (FIPS) 140-2 Advanced Encryption Standard (AES). Compression software is contained within TDClient, so separate steps are not needed in your send and receive scripts. TDClient is supported under several mainframe and mid-range operating systems. A list of supported operating systems can be found in the SAIG Host Communication Guide.

EDE Input and Output Files

Input Data Files

Input data files are files that you create in your own system to submit your student FAFSA and FAFSA correction data. To be processed, these data files must match the record layouts included in the "Record Layouts" section of this technical reference.

Electronic FAFSA

After a student has completed and signed his or her FAFSA, a school's authorized FAA can submit it electronically by entering the data on the FAA Access to CPS Online Web site or by transmitting it to the CPS in a formatted ASCII file. The CPS transmits processed FAFSA records back to the school's mailbox as ISIRs in the IDAP22OP message class. (A message class is a group of records of the same type.)

The "Record Layouts" section of this technical reference contains the FAFSA Application Export Record Layout (EAPS22IN). Reject codes are found in the "Processing Codes" section. Procedures for handling rejected FAFSAs are located later in this section and in the "EDE Processing" section. The "Printing" section includes details on printing ISIRs.

Electronic Corrections

Schools can submit corrections to FAFSA data electronically by entering the data on the FAA Access to CPS Online Web site or by transmitting it to the CPS in a formatted ASCII file format.

You can find the Correction Record Layout in the "Record Layouts" section of this technical reference. Electronic corrections are submitted in the CORR22IN message class. Valid field content specifications for the fields that you can correct are found in the "Processing Codes" section.

Information about adding your Federal School Code to receive electronic data, making signature corrections, and using the Correction Record Layout is located in the "EDE Processing" section.

Output Data Files

Output data files are the files you receive as a result of your submitting FAFSA or FAFSA correction data. You either receive a processed ISIR data file or a record level reject data file. The ISIR file contains student records that met the layout specifications expected by the CPS and defined in the "Record Layouts" section. Record level reject error files include student records that could not be processed because the format or the data in the file did not match the specifications.

ISIR

The CPS generates and sends an ISIR to each school listed on the student's FAFSA, in response to the following input:

- Electronic FAFSAs or corrections submitted by your school using EDE or FAA Access to CPS Online

- Electronic FAFSAs or corrections submitted by another school using EDE or FAA Access to CPS Online

- Web FAFSAs or corrections submitted using FAFSA on the Web or Corrections on the Web

- Paper FAFSAs or corrections to a Student Aid Report (SAR)

- Postscreening transactions from the National Student Loan Data System (NSLDS®) or the Department of Homeland Security (DHS)

- System-generated transactions created by the CPS to provide updated data, such as revised match information from the Department of Defense (DOD) Match

- Federal Student Aid Information Center (FSAIC) corrections as a result of a student correction request or for issues such as a data entry error

- FAFSA data entered by FSAIC through the FAFSA on the phone application process

School Codes Included in the ISIR File

The Federal School Codes listed on the ISIR depend on whether you represent a school, servicer, or state agency, as shown below:

- **School –** For each student, you will receive one ISIR that includes your Federal School Code. All other Federal School Code and Housing Code positions will be blank. In addition, the Electronic Federal School Code Indicator and FAA Federal School Code fields will *always* be blank, and the Electronic Transaction Indicator (ETI) Flag field will be set to the ETI flag of the school receiving the ISIR.

- **Servicer –** You will receive one ISIR for each student with only one Federal School Code and housing code listed. You will receive multiple ISIRs for a student if he or she included more than one Federal School Code for schools you service. In addition, the Electronic Federal School Code Indicator and FAA Federal School Codes fields will *always* be blank, and the ETI Flag field will be set to the ETI flag of the school receiving the ISIR.

- **State Agency –** You will continue to receive ISIRs as you have in the past; all school and housing codes that the student listed on the FAFSA will be included on the ISIR.

The "Record Layouts" section of this technical reference provides the ISIR Record Description/Data Dictionary record layout. The "Processing Codes" section includes information on reject codes, the appropriate action to take in response to a reject code, and the comment codes associated with the reject. Specifications for printing the ISIR are in the "Printing" section.

Handling Record Level Rejected Records

If the specifications in this technical reference are not followed on a particular record, an EDE Record Level Error Report File is transmitted to you and can be printed as an error report. The error layout is in the "Record Layouts" section.

The EDE Record Level Error Report Import Record Layout contains the student's Social Security Number (SSN), name ID, transaction number, last name, first name, the Federal School Code, the CPS Correction # (number) in error, an edit code, an error code, and a text explanation for the reason the record was rejected. Each field in error is reported in this file. If the record was rejected due to an invalid value, the CPS sends the actual value of the data received from the school. When a record has more than one field in error, the student's SSN is listed more than once in the EDE Record Level Error Report File. See the "Processing Codes" section for additional details about rejects.

The following is a list of message classes for reporting errors:

Message Class	Data
CORE22OP	Electronic Correction Errors
EAPR22OP	Electronic Application Errors
SIGA22OP	Signature Record Errors

What's New and Changed in the *EDE Technical Reference* for 2021-2022

Listed below are the changes to each section of the *EDE Technical Reference*. For a complete listing of changes to the CPS, including changes to database matches and system edits, refer to the *2021-2022 Summary of Changes for the Application Processing System* guide. You can find this guide, available later this fall, on the U.S. Department of Education's Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

We revised the *EDE Technical Reference* for the annual rollover changes that include updating year references and adding, removing, renaming, renumbering, and updating the fields' start and end positions and valid content based on changes to the ISIR.

This technical reference has been updated to reflect the changes to the FAFSA process.

"Overview" Changes

Here, we revised the "What's New and Changed in the *EDE Technical Reference* for 2021-2022" section to describe changes to the document.

"EDE Processing" Changes

We revised this section to include annual rollover changes and updated the Signed Numeric Fields Table based on ISIR field name and number changes.

"Record Layout" Changes

The record layouts for 2021-2022 did not change significantly.

Each record layout includes a column called "Changes," which describes changes to that field; review that column for specific changes.

"Processing Codes" Changes

2021-2022 ISIR Cross-Reference

In this section, we updated the cross-reference to compare the 2020-2021 ISIR with the changes to the 2021-2022 ISIR record layout.

Table of Reject Codes and How to Respond to Each Code

- We incremented the date of birth end-year references in Rejects A and B, which alert FAAs that the date of birth entered may be in error, because the student is older (greater than 75) or younger (less than 16) than most students pursuing a postsecondary education:
  - **Reject A** – Date of birth year equals 1900 through 1946
  - **Reject B** – Independent student and date of birth is on or after September 01, 2005, and the Social Security Administration (SSA) match for the student is not equal to "4" (successful match)

Transaction Reject Error Messages

- We updated the year indicator in error 13 to "2" for 2021-2022.

Assumption Overrides

- We updated the tax year information in Assumption Override codes 5 and 6.

Field Name and Position Cross-References

- We updated the ISIR Cross-Reference Table to reflect changes to year references in field names and valid content. The field numbers, CPS correction numbers, and field positions did not change.

NSLDS Loan Program Codes

- The NSLDS program codes did not change.

Correction Data Entry Specifications

We updated the data entry specifications to reflect the year reference changes in field names and valid content.

Message Class Changes

- We updated the process year in all message classes from "21" to "22."

Comment Codes

- The "Comment Codes" section contains no significant changes. For more information, see the *Summary of Changes for the Application Processing System* guide, which describes the changes to the comment codes and text, or review the *SAR Comment Codes and Text* guide's "Changes" column. Both guides will be available on the IFAP Web site later this fall.

"Printing" Changes

The "Printing" section describes the ISIR printed from EDExpress. For a complete list of changes to the ISIR printed from EDExpress, see the "Printing" section in this guide or the *2021-2022 ISIR Guide* on the IFAP Web site, located at ifap.ed.gov.

Note: You are not required to print ISIRs. If you choose to print ISIRs, you can print them from your own system or EDExpress. You are also not required to print the ISIR output document exactly as the EDExpress software prints it. For more information on printing ISIRs, refer to the "Printing" section in this technical reference.

The following changes were made to the ISIR printed from EDExpress:

- Two new flag fields are printed on the ISIR under the "IRS Data Field Flags." The flags are for the student and parent "Filed Schedule 1."
- For accessibility purposes, the placement of fields on pages 2 and 3 are slightly adjusted and the NSLDS pages were redesigned.

EDE Processing

Table of Contents

Introduction

This section provides information about codes and messages associated with the Central Processing System (CPS) Electronic Data Exchange (EDE) process. The data specifications provided here will further help you define your system, submit your data, and correct errors or Free Application for Federal Student Aid (FAFSA®) data.

Electronic FAFSA®

Although most students now use FAFSA on the Web to apply for federal student aid, destination points can still collect FAFSA data on a paper FAFSA and then key-enter the data to transmit it as an electronic FAFSA to the CPS. After the CPS processes the data, the results of the electronic FAFSA are transmitted back to the destination point.

The FAFSA data is submitted in the EAPS22IN message class, and processing results are returned in the IDAP22OP message class.

FAA Access to CPS Online allows financial aid administrators (FAAs) to enter and transmit FAFSA information using the Internet. However, schools can choose to develop their own software. The remainder of this section includes specifications for developing software to provide the required electronic FAFSA functions.

Electronic FAFSA® Process

The electronic FAFSA process consists of five steps:

1. The student submits a completed and signed paper FAFSA to the school.

2. The information on the FAFSA is key-entered.

3. The file is formatted and transmitted to the CPS through the Student Aid Internet Gateway (SAIG).

4. The FAFSA data is edited and corrected until a clean data file is created. The CPS edits the data for inconsistencies. The data elements for each field must be in the valid range with no inconsistencies in the data. For example, if a student indicates a marital status of single, yet provides income earned from work for student and spouse, an edit is triggered at the CPS.

5. The CPS transmits processed FAFSA records back to the destination point as Institutional Student Information Records (ISIRs) under the message class IDAP22OP. A paper Student Aid Report (SAR) is also sent to the student. Depending on the processing results, a student may be sent a SAR Acknowledgment or e-mail notification of SAR processing.

Receiving the Completed and Signed FAFSA®

Schools participating in electronic application submission must have their students complete and sign the FAFSA. Schools must maintain the required original student signature and, in the case of a dependent student, the signature from one parent whose information is provided on the form.

In the past, schools relied on the paper FAFSA to collect the student's and parents' information and signature. As we continue to encourage use of the electronic application and reduce reliance on the paper FAFSA, we remind you of an alternative for this documentation process: the PDF FAFSA. Students can download, complete, and print English and Spanish 508-compliant PDF versions of the 2021-2022 FAFSA beginning in late September from the StudentAid.gov Web site. Schools can also download the PDF from the IFAP (ifap.ed.gov) Web sites beginning in late September.

Entering and Formatting FAFSA® Information

As part of the FAFSA entry and formatting process, you are responsible for ensuring that the data meets the field-by-field criteria provided in the "Valid Content" column of the FAFSA Application Export Record Layout. The record created by your system or software must adhere to the record layout provided in the "Record Layouts" section with the addition of a Carriage Return/Line Feed (CR/LF, ASCII 13 [HEX 0D] / ASCII 10 [HEX 0A], respectively) at the end of each record. Use of an end-of-file mark (ASCII 26 or HEX 1A) is optional. FAFSAs with invalid dates or formats are rejected.

Transmitting the Records

Use EDconnect, the transmission software provided by ED, to format your data records and transmit them through the SAIG.

Mainframe users can use the TDClient software to submit data records. Instructions are available in the SAIG Host Communication Guide.

Receiving Processed Records

You receive your processed FAFSA records in ISIR format in the IDAP22OP message class.

Note: See the "Printing" section for more information on printing ISIRs.

Rejected FAFSA® Records

Instances may occur when the CPS does not accept your records for processing. The CPS returns a rejected electronic FAFSA error report to you in the message class EAPR22OP. The "Record Layouts" section contains the EDE Record Level Error Report Import Record Layout. The "Processing Codes" section contains additional information on the reject reasons found in the record layout.

The two categories of rejections for submitted FAFSA records are shown below:

- **Transaction Rejects** – A transaction reject prevents the FAFSA record from being processed. If a record is rejected for one or more reasons, an error report is returned to the school in message class EAPR22OP (see the EDE Record Level Error Report Import Record Layout in the "Record Layouts" section), and no ISIR is created. These rejects are also known as record-level rejects.

- **Compute Rejects** – The CPS employs a series of edits to evaluate data on incoming FAFSA records for consistency and completeness. These edits apply to all data from electronic and paper input. The CPS does not compute an Expected Family Contribution (EFC) for a FAFSA rejected for a compute reject reason. However, an ISIR is produced. ISIRs with a compute reject are returned in the IDAP22OP message class. The reject reason codes for the compute reject are located in positions 1408 through 1421 of the ISIR. Procedures for responding to the reject codes are contained in the "Table of Reject Codes and How to Respond to Each" table in the "Processing Codes" section of this technical reference.

In the paper system, a student can confirm a data field by re-entering the same information in the SAR correction column for the field in question. In the electronic process, the school verifies the data (by re-entering the data as a "correction") and transmits the correction record to the CPS. Data that must be verified or corrected in response to each reject reason is provided in the "Processing Codes" section.

ISIR

The ISIR is a fixed-length record containing reported information from the FAFSA, as well as key processing results, including National Student Loan Data System (NSLDS®) information. NSLDS information is located at the end of the ISIR Record Description.

The CPS sends the ISIR electronically to institutions that the student has indicated he or she is interested in attending. Generally, all information printed by the CPS on the paper SAR is coded in the ISIR file. Descriptions of the contents of the ISIR are in the "Record Layouts" section.

School Codes Included in the ISIR File

The Federal School Codes listed on the ISIR depend on whether you represent a school, servicer, or state agency, as shown below:

- **School –** For each student, you will receive one ISIR that includes your Federal School Code. All other Federal School Code and Housing Code positions will be blank. In addition, the Electronic Federal School Code Indicator and FAA Federal School Codes fields will *always* be blank and the Electronic Transaction Indicator (ETI) Flag field will be set to the ETI flag of the school receiving the ISIR. Schools with main and branch campuses serviced by one TG number will receive multiple ISIRs for one student if the applicant listed more than one Federal School Code associated with the TG number.

- **Servicer –** You will receive one ISIR for each student with only one Federal School Code and housing code listed. You will receive multiple ISIRs for a student if he or she included more than one Federal School Code for schools you service. In addition, the Electronic Federal School Code Indicator and FAA Federal School Codes fields will *always* be blank, and the ETI Flag field will be set to the ETI flag of the school receiving the ISIR.

- **State Agency –** You will receive ISIRs that include all school and housing codes that the student listed on the FAFSA.

Note: The average CPS processing time is between 48 and 52 hours.

ISIR Datamart

The ISIR Datamart is the centralized location that stores ISIR data generated by the CPS. Schools, state agencies, and other authorized users receive ISIR distributions from the datamart through the SAIG when requests are made using the ISIR Request function in FAA Access to CPS Online.

You can establish your school's preferences regarding receiving "daily" ISIR files or requesting ISIR files from the ISIR Datamart on the SAIG Enrollment Web site, located at fsawebenroll.ed.gov.

"Daily" ISIRs and requested ISIRs are described in more detail below.

ISIR Receipt Types and Message Classes

The CPS generates ISIRs in response to input from students or schools. This includes input such as FAFSAs, FAFSA corrections, and CPS-generated transactions. These ISIRs are categorized in three general types—daily ISIRs, requested ISIRs, and pushed ISIRs—and are described on the following pages.

Daily ISIRs – IDAP22OP, IDSA22OP, and IGCO22OP

Schools can receive "daily" ISIRs, or request specific ISIRs or groups of ISIRs, from the ISIR Datamart. Daily ISIRs are generated daily in response to FAFSAs or corrections entered by you or at a site other than your school, including the following sources:

- Paper FAFSAs or SARs processed by the Image and Data Capture (IDC) processor

- FAFSAs or Corrections on the Web

- FAFSAs or corrections on FAA Access to CPS Online

- Electronic FAFSAs or corrections by another EDE school or third-party servicer

The CPS sends these ISIRs to school destination points in the IDAP22OP, IDSA22OP, and IGCO22OP message classes.

All users, by default, are set up for the daily ISIR distribution preference. This preference can be updated at any time using the SAIG Enrollment Web site.

If you select daily receipt of ISIRs, you can also use the datamart as needed to request ISIRs. All ISIR transactions for each student are stored in the datamart and are available for retrieval upon request. The FAA Access to CPS Online Web site enables you to submit requests to the datamart for specific ISIR data based on query criteria.

Daily ISIR data files are stored for retrieval in your SAIG mailbox under current retention and archival guidelines.

Requested ISIRs – ISRF22OP

Requesting ISIRs is a simple process that enables you to receive only the ISIRs you need. You use the ISIR Request feature on the FAA Access to CPS Online Web site (faaaccess.ed.gov) to request ISIRs from the datamart. The CPS returns these ISIRs to the school in the ISRF22OP message class, and you receive one ISIR for every record that meets the query criteria. You can submit a query request to the datamart for duplicate ISIRs, year-to-date (YTD) files, or federal data request (FDR) files (for state agencies only). You can request the same ISIR as many times as necessary.

Your school must be listed on the specific ISIR transaction being requested.

As queries are run against the datamart, files of requested ISIRs are generated and sent to you through the SAIG. These files must be retrieved from your SAIG mailbox within 14 calendar days, or they are deleted (and cannot be restored). If they are deleted, you can resubmit the same request to the datamart, and the data is generated and sent to you again.

You can view the request date and status any time after submitting a request. If the request has been processed, you can also view the request completion date and the number of ISIRs that were sent. You can submit as many query requests to the ISIR Datamart per day as necessary to retrieve the data you require.

Titles must be added to each query request you submit, and the title you enter is returned in the ISIR file you receive as a result of your request. This assists you in matching ISIR files to individual requests you have submitted to the datamart. Titles can be up to 50 characters in length.

When you return to FAA Access to CPS Online to enter a new ISIR request, your most recently completed or pending requests are displayed. Rather than creating a new query, you can save time by using a prior query again to request ISIRs, provided the parameters still apply. You may want to modify the title of the request to distinguish it from other requests you have previously submitted.

For your convenience, queries can be set up to run on a future date. For example, you can set a date in the future to receive all ISIRs processed on or before key deadlines at your school or state agency.

If you want your query to run as soon as possible, simply leave the execute date blank, and your query will run after the next CPS compute.

Automatically Pushed ISIRs – IGSG22OP and IGSA22OP

Certain ISIR transactions processed by the CPS are automatically distributed (or "pushed") to you, regardless of the ISIR delivery option selected on the SAIG Enrollment Web site, because they require you to take some sort of action. An example of a pushed ISIR would be a student-initiated correction that causes a change to the EFC.

ISIRs that are generated and automatically distributed to the school are sent in the following message classes:

IGSG22OP

When your Federal School Code is listed on the following types of transactions, a system-generated ISIR is automatically pushed to your school in the IGSG22OP message class:

- CPS reprocessing
- Department of Homeland Security (DHS) automated secondary confirmation
- NSLDS Postscreening
- Applicant's Social Security Number (SSN) is included in the Department of Defense (DOD) file after his or her initial transaction is processed
- Applicant's record is released from a drug abuse hold

IGSA22OP

When a correction record processed by the CPS results in one of the following changes, the school that submitted the correction receives the transaction in a daily ISIR file (IGCO22OP), while all other schools listed on the transaction receive a pushed ISIR file (IGSA22OP):

- Reject Status changes (records that change from a rejected status to having a calculated EFC or from having a calculated EFC to a rejected status)

- Verification Status changes (not selected to selected)

- EFC value changes, such as records that now have a higher or lower EFC

- SAR C Code changes

Pushed ISIR data files are stored in your SAIG mailbox under current retention and archival guidelines.

Each school subscribing to the daily ISIR service receives one ISIR for every student who lists that school on the FAFSA. Regardless of the service for which a school has enrolled, all schools receive pushed ISIRs.

Servicers will receive one ISIR for each student with only one Federal School Code listed and may receive multiple ISIRs for a student if he or she included more than one Federal School Code for schools managed by the servicer. For message class details, state agencies should refer to the state agencies information later in this section.

Important Information about ISIR Files

- **Schools Must Obtain ISIRs for All Eligible Students.** Although the options available through the ISIR Datamart are extensive, you are obligated to obtain ISIRs for all eligible students who enroll at your school.

- **Develop an ISIR Request Process.** We highly recommend that you develop a process for requesting ISIRs from the datamart that takes into account your ongoing student admissions process, as well as the tracking and monitoring of existing students with paid-on ISIR transactions.

- **Review ALL Pushed ISIRs.** Your school *must* review all pushed ISIRs and assess any potential impact to your students' aid eligibility, regardless of whether or not you select the "daily" ISIR distribution.

- **Schools Choosing NOT to Receive Daily ISIRs.** Schools that elect not to receive daily ISIRs and instead request specific ISIR transactions from the datamart *must* continue to review ISIR transactions for all enrolled students.

State Agency Options

State agencies can combine processed FAFSA data with state data to award state scholarships and grants.

As destination points, state agencies can automatically receive ISIRs from the CPS or request ISIRs from the ISIR Datamart. The message classes used by state agencies for 2021-2022 are listed below.

Message Class	Data
IDNR22OP	Daily State Agency ISIR Non-Resident
IDRE22OP	Daily State Agency ISIR Resident
IGNR22OP	CPS Pushed State Agency ISIR Non-Resident
IGRE22OP	CPS Pushed State Agency ISIR Resident
ISRF22OP	Requested ISIR Data from the ISIR Datamart

You can set up your ISIR request preference in the Participation Management System on the SAIG Enrollment Web site, located at fsawebenroll.ed.gov. For more information, contact CPS/SAIG Technical Support through e-mail at CPSSAIG@ed.gov or at 800/330-5947.

Electronic Corrections

Schools with destination points enrolled for electronic correction processing can transmit FAFSA data corrections through FAA Access to CPS Online.

FAA Access to CPS Online allows schools to enter and edit correction data according to the CPS system requirements. However, schools can choose to develop their own software or system to enter, edit, and format correction data. We provide specifications for developing correction software in the remainder of this section.

You submit correction data in the CORR22IN message class, and the CPS returns the resulting ISIR in the IGCO22OP message class.

General Correction Entry Specifications

When you are submitting correction data, only the corrected information from a student's record is transmitted to the CPS, not the complete applicant record. This approach minimizes the transmission volume. Correction information is transmitted as a fixed-length record. The layout and description of this record is in the Correction Export Record Layout (CORR22IN) in the "Record Layouts" section.

Creating a Correction Record

Follow these steps to create a correction record:

1. In the first position of the record, enter **2** to indicate that this is a correction to a 2021-2022 applicant transaction.

2. In positions 2 through 10, enter the applicant's original SSN. This is the number reported by the applicant on the FAFSA form and does not reflect any corrections to the SSN that might have been made.

3. In positions 11 and 12, enter the first two letters of the applicant's original last name. These are the letters reported by the applicant on the FAFSA form and do not reflect any corrections to the last name that might have been made.

4. In positions 13 and 14, enter the transaction number of the ISIR being corrected. For example, enter **01** to correct the first transaction on file at the CPS. The transaction does not necessarily have to be the latest one on file at the CPS. If the transaction number being corrected is not in the CPS database, the record is rejected. To correct the most recent transaction, enter **99**.

    Note: When making a correction using transaction 99, you must also provide corrections to CPS Correction Number (CPS Corr #) 129 (the first Federal School Code), Corr # 170 (DRN), and Corr # 150 (signatures) on the record.

5. In positions 15 through 17, enter the CPS Corr # of the field being corrected. Each correctable field has a three-digit CPS Corr # associated with it. For example, enter **001** to correct the student's last name. We have provided the CPS Corr # with valid content in the Correction Data Entry Specifications table found in the "Processing Codes" section.

6. In positions 18 through 52, enter the new value for the field being corrected.

7. Optional: In positions 53 through 470, you can enter or correct student data in other fields. See the second note below for more information.

8. Optional: In positions 471 through 520, enter or correct the student's e-mail address.

9. Optional: In positions 521 through 570, enter or correct the parent's e-mail address.

10. Optional: In positions 571 through 620, enter or correct the student's high school name.

11. In positions 621 through 622, enter **1C** for the transaction data source/type code.

12. In positions 623 through 630, enter the transaction receipt date. Enter the date you are making the correction. The CPS updates this information on the ISIR with the date the CPS receives this correction.

13. You can set assumption override codes (1 to 6) in positions 631 through 636 and reject override codes for reject 3, 12, 20, 21, A, B, C, G, J, K, N, and W in positions 637 through 648.

14. In positions 649 through 654, enter the Federal School Code of the school making the correction.

15. Positions 655 to 680 are for Federal Student Aid use only and must be blank.

Note: To correct a field to blank, enter a single asterisk (*) left-justified in that field. The Correction Data Entry Specifications table in the "Processing Codes" section distinguishes which fields you can correct to blank. Not all fields can be corrected this way.

Note: Up to 12 SAR data fields can be corrected on a single record. If you are correcting more than one field, repeat steps 5 and 6 using the remaining data fields on the correction record. If more than 12 fields require correction, you must create an additional record, repeating steps 1 through 13.

Detailed Data Entry Specifications

Each corrected value must meet certain standards; otherwise, the correction record is rejected. We have provided field-by-field data entry specifications in the Correction Data Entry Specifications table in the "Processing Codes" section of this technical reference. For each field, these specifications identify the type (character, numeric, or signed numeric), the acceptable length, and the valid values for the correction. The specifications also show whether the field is correctable and if it is correctable to blank.

Keep the following information in mind:

- All correction values must be left-justified in the correction record. Use leading zeros, if necessary, to increase the correction value to the valid field length. Leave blank any empty positions to the right. Some correction values do not have a fixed length, although they cannot be longer than the maximum length of the field. For example, to correct the number of family members to five, enter **05** in positions 18 and 19, leaving positions 20 through 52 blank. To correct a student's last name to Smith, enter **SMITH** (in uppercase, as the layout notes) in positions 18 through 22 and leave positions 23 through 52 blank.

- A field content of all nines indicates the reported or calculated value is greater than or equal to the value of all nines. Blanks are allowed in some fields.

- Fields can contain one of three data types: character, numeric, or signed numeric.

A negative entry is acceptable for a limited number of fields. The Correction Data Entry Specifications table in the "Processing Codes" section identifies the fields in which a negative is acceptable under the "Justify/Signed" column and the "Valid Field Content" column. The signed numeric fields are defined on the next page. In the case of signed numeric fields, the sign is always implied in the right-most character of the field. For example, if the student's adjusted gross income (AGI) is negative 3507, then the value in the record contains 000350P. Because the AGI value does not contain as many bytes as the correction field, the value must have leading zeros. To determine the last digit, use the chart below. Determine if the value is positive or negative and select the corresponding value for the last digit.

The following chart explains the conversion of the sign and the number:

	0	1	2	3	4	5	6	7	8	9
Positive Values	{	A	B	C	D	E	F	G	H	I
Negative Values	}	J	K	L	M	N	O	P	Q	R

Making Signature Corrections

Signature information is required to resolve signature rejects (rejects 14, 15, and 16). You do not need to provide signature information on other standard corrections unless you are using 99 as the transaction number. If you have a transaction that was a reject 14, 15, or 16, simply correct CPS Corr #150 (Signed By) to A (Applicant) or B (Both = Student and Parent), as appropriate.

If you need to add a signature to a student's record that is on hold for lack of signatures, you must use the layout for Signature Record Export Record Layout (SIGS22IN) found in the "Record Layouts" section. You can add the student or parent signature using this layout. You must make sure the student included your school on the FAFSA or correction.

Adding Your Federal School Code to Receive Electronic Data

A school cannot make electronic corrections unless it has been designated on the applicant's transaction. You can add your Federal School Code to the list of schools receiving data electronically and correct other fields on the record by using the Correction Record Layout (CORR22IN).

Notes about adding your school code through EDE:

- A school can only add its own Federal School Code; it cannot add the code of other schools or branches. A school can place its Federal School Code in any of the school code positions, but when the correction is processed, the CPS moves the code to the first position.

- A school cannot delete another school's Federal School Code from a student's transaction.

- A school cannot add its Federal School Code to a student's transaction that already includes ten Federal School Codes.

- A school can only change the housing status for its own Federal School Code.

Follow these steps to add your Federal School Code or to make corrections:

1. In the first position of the record, enter **2** to indicate that this is a correction to a 2021-2022 applicant transaction.

2. In positions 2 through 10, enter the applicant's original SSN. This is the number reported by the applicant on the FAFSA form and does not reflect any corrections to the SSN that might have been made.

3. In positions 11 and 12, enter the first two letters of the applicant's original last name. These are the letters reported by the applicant on the FAFSA form and do not reflect any corrections to the last name that might have been made.

4. In positions 13 and 14, enter the transaction number of the ISIR being corrected. For example, enter **01** to correct the first transaction on file at CPS. The transaction does not necessarily have to be the latest one on file at the CPS. If the transaction number being corrected is not in the CPS database, the record is rejected. You can use transaction 99 to add your school code to the most recent transaction in the CPS database.

    Note: You cannot add your school code to a transaction that includes a professional judgment performed by another school.

5. Enter **170** in the CPS Correction Number Correction #1 field, positions 15 through 17 (corresponding to the CPS Corr #170, the Data Release Number [DRN]).

6. Enter the student's DRN in Correction Data 1 field, positions 18 through 52. Remember to left-justify it and leave any unused bytes blank.

    Note: The CPS has assigned a unique DRN to each Title IV applicant. The DRN appears on paper SARs and confirmation pages for FAFSA on the Web transactions. If a valid DRN is not present on the correction record containing the Federal School Code change, the record is rejected.

7. Enter the CPS Corr # associated with the Federal School Code position being changed in the CPS Correction Number – Correction #2 field, positions 53 through 55. Possible field numbers are 129, 131,133, 135, 137, 139, 141, 143, 145, and 147.
    Note: Schools can add the Federal School Code to any of the school code positions; however, the CPS moves the school code to the first school code position during correction processing. The ISIR that the school or servicer receives includes only that school's Federal School Code; the other codes are removed.

8. Enter the Federal School Code in the Correction Data 2 field positions 56 through 90. Remember to left-justify it and leave any unused bytes blank.

    You can only change the Federal School Code to the code of the participating EDE school submitting the correction. You also must enter this code in the EDE Federal School Code field, positions 649 through 654. If the codes in these two fields do not match, the record is rejected.

    Schools can modify the Federal School Code and make other corrections to the applicant record on the same correction transaction.

9. Optional: In positions 471 through 520, enter or correct the student's e-mail address.

10. Optional: In positions 521 through 570, enter or correct the parent's e-mail address.

11. Optional: In positions 571 through 620, enter or correct the student's high school name.

12. In positions 621 through 622, enter **1C** for the transaction data source/type code.

13. In positions 623 through 630, enter the transaction receipt date (the date you are making the correction). The CPS updates this information on the ISIR with the date the CPS received this correction.

14. You can set assumption override codes (1 to 6) in positions 631 through 636 and reject override codes for reject 3, 12, 20, 21, A, B, C, G, J, K, N, and W in positions 637 through 648.

15. In positions 649 through 654, enter the Federal School Code of the school making the correction.

16. Positions 655 to 680 are for Federal Student Aid use only and must be blank.

Tips for Corrections

When you submit an ISIR correction to the CPS, we use the transaction number you provide in positions 13 and 14 as a template. We make changes to the fields you indicated, leaving other fields unchanged.

Your Federal School Code must be one of the ten listed, but it does not have to be the first college choice on the transaction to be processed by the CPS. You receive the processed results in the IGCO22OP message class.

Only 30 transactions can be created for a student's record. After 30 transactions have been created, the record is locked, and we do not permit any corrections to the record.

If you are submitting a dependency override or professional judgment (EFC recalculation) as part of the correction record, only your school receives the resulting corrected ISIR transaction. Also, *do not* send a dependency override correction along with a professional judgment to a transaction that does not have an EFC.

1. If the transaction has no EFC, send the dependency override along with any other corrections necessary to obtain an EFC.
2. Submit the professional judgment using the transaction with the dependency override and the EFC. When submitting a professional judgment, you must submit a correction to at least one field that affects the EFC calculation.

Rejected Correction Records

The two categories of rejections for submitted correction records are as follows:

- **Transaction Rejects** – A transaction reject prevents the correction from being applied to the student's record. If a correction record is rejected for one or more reasons, the school receives an error report in message class CORE22OP (see the EDE Record Level Error Report Import Record layout in the "Record Layouts" section). No ISIR is created.

- **Compute Rejects** – The CPS employs a series of edits to evaluate all incoming FAFSA and correction data for consistency and completeness. These edits apply to all data from electronic, Web, and paper input. The CPS does not compute an EFC for a correction rejected because of a compute reject. However, an ISIR is produced. Correction ISIRs with a compute reject are returned in the IGCO22OP message class. The reasons for the compute reject are indicated on the ISIR in the Reject Reason Codes field, positions 1408 through 1421. Refer to the "Processing Codes" section for information on interpreting these reject codes.

In the paper system, a student can confirm a data field by re-entering the same information in the SAR correction column for the field in question. In the electronic process, the school can confirm the data (re-enter the data as a "correction") or set the appropriate reject override (found at the end of the CORR22IN Record Layout in positions 637 through 648) and transmit the correction record to the CPS. Data that must be verified or corrected in response to each reject reason is provided in the "Processing Codes" section.

Introduction

This section provides all the record layouts you need to create your own software to participate in the Electronic Data Exchange (EDE) process.

Request Title in Institutional Student Information Record (ISIR) Files

To identify the group of ISIRs belonging to your datamart requests, a request title for each query is returned in the resulting ISIR file sent to your school. The title appears as the first detail line in the ISIR file after the Student Aid Internet Gateway (SAIG) header record. The title is in positions 1 to 50. Positions 51 to 4300 are blank.

In addition, to ensure that the ISIR data from the Central Processing System (CPS) for all ISIR records is consistent with your school's software, this request title is part of the daily and pushed ISIR files you receive. For these ISIR files, the first detail line contains all blanks in positions 1 to 4300. Examples are listed below.

ISIRs received as a result of a datamart request

Line 1: O*N05 record (SAIG header record)

Line 2: Request Title (up to 50 bytes of description from the datamart query)

Line 3: First ISIR record meeting request query

Line 4: Second ISIR record meeting request query

Line 5: O*N95 record (SAIG trailer record)

ISIR received as part of daily ISIRs or pushed ISIRs

Line 1: O*N05 record (SAIG header record)

Line 2: Blank line

Line 3: First ISIR record sent to your school

Line 4: Second ISIR record sent to your school

Line 5: O*N95 record (SAIG trailer record)

Processing Codes

Table of Contents

Introduction

This section provides tables of codes, messages, and data specifications to assist you in defining your system, submitting your data, and correcting errors or Free Application for Federal Student Aid (FAFSA®) data, as well as other processing codes associated with the Central Processing System (CPS) Electronic Data Exchange (EDE) process.

A summary of the tables in this section appears below:

2021-2022 ISIR Cross-Reference

This cross-reference table compares the 2020-2021 Institutional Student Information Record (ISIR) field number, start position, and end position with the 2021-2022 ISIR field number, start position, and end position. It also lists the field values (for each field) that have changed from the last award year.

Table of Reject Codes and How to Respond to Each

Use this table to determine the meaning of reject codes on a Student Aid Report (SAR) or ISIR. The table outlines how to correct each reject and references comment code numbers associated with the rejects.

Transaction Reject Error Messages

This table reports the Record Reject codes (3 to 16) and the Transmission Error codes (17 to 18). The table lists the actual text for each reject code, a description of the error, and a resolution for each error. The record error messages indicate that the individual student record was not processed. You must fix any student record with a record error message and send it to the CPS again for processing to generate another ISIR. Transmission errors are problems with the transmission of the records.

Assumption Overrides

This table associates the override codes with the assumption the CPS makes during processing. It also explains what happens if you use this code and provides an example of when you would use this code.

Field Name and Position Cross-References

Use this table to determine which fields were verified or corrected in the previous transaction or which fields are highlighted on the ISIR. It also defines the field positions for the SAR field, the FAFSA field name, and the question number on the FAFSA.

NSLDS Loan Program Codes

Use the codes in this table to identify loan program types sent by NSLDS on ISIRs. These codes are described in the six NSLDS Loan Program Code fields in the ISIR Record Description/Data Dictionary found in the Record Layouts section of this technical reference.

NSLDS Loan Current Status Codes

Use the codes in this table to determine the current loan status information sent by NSLDS on the ISIR. These codes are described in the six NSLDS Loan Current Status fields in the ISIR Record Description/Data Dictionary found in the Record Layouts section of this technical reference.

State/Country/Jurisdiction Codes

Use the codes in this table to determine the valid state abbreviations used for the following fields, which are found in various record layouts in this technical reference:

- Student's Permanent State

- Student's Driver's License State Code

- Student's State of Legal Residence

- High School State

- Parents' State of Legal Residence

Correction Data Entry Specifications

You can use this table in conjunction with the Correction Export Record Layout found in the Record Layouts section. The table defines the CPS Correction Number and field length. It defines the valid data to send for each field on a correction record. The table also indicates if the CPS Correction Number field is a signed value, the justification of the field, and if the field can be corrected to blank.

Message Classes

This table lists the message classes associated with application processing.

Comment Codes

This section describes where to find information about changes to the SAR comments.

Transaction Reject Error Messages

2021-2022 Note: This table was changed to increment the year reference in Error Code 13.

Error Code	Error Message	Error Resolution and/or Description
03	Not Found on Database	SSN and Name ID are invalid or do not match record in database.
04	School Code Not On Record	Requesting institution is not listed on database record and is not included in the correction record.
05	DRN Number Missing or Invalid	Requesting school is not listed on database record and is included in the correction record with the applicant's incorrect DRN.
06	School Code Already on Record	The only correction being made is to your Federal School Code, which is already listed on this record. If nothing else needs to be corrected you do not need to send this record again. If you have other corrections to this record, make them and send the record again without your school code.
07	Invalid Transaction Number	Blank or invalid transaction number
09	Too Many Transactions	Transaction number is greater than 30.

Call the regional office of the Department of Education for instructions. |
| 10 | Previous Application Already on CPS Database | FAFSA with the same SSN and Name ID is already on file on the CPS match record in database. |
| 11 | (Various messages; invalid data displayed on error file) | Out of range or invalid value in data field. Review the valid field content in this technical reference and compare it to the data you submitted to the CPS. |
| 12 | (No message)

Or

SSN Missing or Invalid | Incorrect field number or missing field number. Confirm that field number used was valid on your record.

Or

The SSN is missing or not in the valid range. |
13	Corr Yr not 2	Year Indicator not equal to 2.
14	Data Type Does Not Match Message Class	Data type does not match message class. Confirm that the data in the file is being sent in the correct message class.
15	EDE School Code Invalid	School not participating

Assumption Overrides

2021-2022 Note: This table was changed to update FAFSA field numbers and increment the year references in overrides 5 and 6.

Assumption Override	Assumption Made When Override Flag Is Not Present	Results Of Setting Override Before Sending Data Triggering Assumption	Situation
1	Parents' number in college assumed to be 1.	Allow number in college to be greater than 6.	The parents' number of family members does not equal the number in college. The parents' number of college students in the household equals 7 or more.
2	Parents' AGI assumed equal to the sum of the parent 1 and parent 2 income earned from work.	Allow parents' AGI to be zero if blank or zero is entered.	Parents' AGI is blank or zero. Tax return status is filed, will file, or blank. Parent 1 income from work or parent 2 income from work is positive or negative.
3	Student's number in college assumed to be 1.	Allow number of family members to be equal to the number in college when they are equal and greater than 2.	The independent student's number of family members equals 3 or more. The number of college students in household is the same value.
4	Student's AGI assumed to be equal to the sum of the student's and spouse's income earned from work.	Allow student's AGI to be zero if blank is entered.	The student's AGI is blank or zero. Tax return status is filed, will file, or blank. Student's income from work or spouse's income from work is positive or negative.

Assumption Overrides (Continued)

Assumption Override	Assumption Made When Override Flag Is Not Present	Results Of Setting Override Before Sending Data Triggering Assumption	Situation
5	Parents' Additional Income calculated from FAFSA question 91 is assumed to be zero.	Allow parents' income calculated by CPS from the Additional Income FAFSA question to be greater than zero and greater than a fixed percentage of the parents' total income.	Parents' calculated 2019 tax status equals filed. Income calculated by CPS from the Additional Income FAFSA question is greater than a fixed percentage of parents' AGI plus parents' total from CPS calculated value for untaxed income. Parents' calculated 2019 tax status equals non-tax filer. CPS calculated value for Additional Income is greater than or equal to a fixed percentage of parent 1 income from work, parent 2 income from work, and parents' total from CPS calculated value for untaxed income.
6	Student's Additional Income calculated from FAFSA question 43 is assumed to be zero.	Allow student's income calculated by CPS from the Additional Income FAFSA question to be greater than zero, and equal or greater than student's total income.	Students calculated 2019 tax status equals filed. Income calculated by CPS from the Additional Income FAFSA question is greater or equal to student's AGI, and student's total from CPS calculated value for untaxed income. Students calculated 2019 tax status equals non-filer. CPS calculated value for Additional Income is greater than or equal to a fixed percentage of student's income earned from work, spouse's income from work, and student's total from CPS calculated value for untaxed income.

Comment Codes

For a listing of changes to the SAR comments, see the *Summary of Changes for the Application Processing System* guide. For a complete listing of SAR codes and comment text, see the companion document to the *2021-2022 EDE Technical Reference* entitled *2021-2022 SAR Comment Codes and Text*. These documents can be found later this summer on the U.S. Department of Education's Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

Printing ISIRs

You are not required to print an Institutional Student Information Record (ISIR) output document. If you choose to print an ISIR, it does not need to be printed exactly as the Department of Education's (ED's) software, EDExpress, prints it.

You can print additional information on the ISIR, such as ISIR fields that EDExpress does not print. The table "ISIR Fields Not Printed on the ISIR" contains those fields and is included in this section of the technical reference. An example of an ISIR printed from EDExpress is included at the end of this section for your reference.

For a complete list of changes to the ISIR that are printed from EDExpress, see the *2021-2022 ISIR Guide* on the Information for Financial Aid Professionals (IFAP) Web site located at ifap.ed.gov.

New for 2021-2022: The following changes were made to the ISIR printed from EDExpress:

- Two new flag fields are printed on the ISIR under the "IRS Data Field Flags." The flags are for the student and parent "Filed Schedule 1."
- For accessibility purposes, the placement of fields on pages 2 and 3 are slightly adjusted and the NSLDS pages were redesigned.

Note: Changes to the EDExpress 2021-2022 ISIR report may occur following the publication of this section. If this occurs, we will update the ISIR sample and repost the "Printing" section of the *2021-2022 EDE Technical Reference.*

The following information describes how EDExpress prints values. We have provided it to assist schools and state agencies in printing the data on an ISIR.

Printing Assumed Values

Assumed Values reflect suppositions the CPS has made in determining the applicant's Expected Family Contribution (EFC). The CPS makes assumptions when the applicant does not report certain information that is necessary for the EFC calculation or when the applicant reports inconsistent information. (Some unreported information results in a rejected transaction rather than assumptions.) The CPS uses the assumed value when calculating the EFC.

For certain fields, the only assumption the CPS ever makes is zero, so these assumption fields on the ISIR contain zeros (for example, ISIR field 257, Assumed Student's U.S. Tax Paid). On the ISIR, EDExpress prints an asterisk (*) to the left of the field title to indicate that the CPS made an assumption, and the assumed value must be printed in place of the reported value.

If a field is both assumed and highlighted, EDExpress prints an asterisk (*) to the left of the field title. For more information on highlighted fields, see the "Printing Highlight Flags" information later in this section. Positions 1472 through 1572 of the ISIR all contain CPS assumption fields.

Printing Intermediate EFC Values

An intermediate EFC is a value used during the EFC calculation process. EDExpress prints the intermediate EFC values as calculated by the formula type.

FAFSA® Data Verify Flags

Free Application for Federal Student Aid (FAFSA®) Data Verify Flags are found on the ISIR (positions 2524 through 2718.) Each FAFSA Data Verify Flag byte corresponds to a specific Student Aid Report (SAR) field and indicates fields corrected to the same value on the transaction being corrected. Refer to the Field Name and Position Cross-References table in the "Processing Codes" section.

If a field was verified as having the same data as in the transaction being corrected, the FAFSA Data Verify Flag contains a value of **1**. A value of **0** (zero) signifies that this field was not corrected to the same value, and a value of **2** means the CPS has asked that the field be verified.

EDExpress *does not* print these flags on the ISIR. These flags were added at the request of third-party servicers to assist them with correction edits.

Printing Correction Flags

Correction flags are found on the ISIR (positions 2104 through 2298) and indicate changes to FAFSA data processed by the CPS. Refer to the Field Name and Position Cross-References table in the "Processing Codes" section.

If a field was corrected on the current transaction, the correction flag contains a value of **1**. If a field was corrected on a previous transaction, the correction flag contains a value of **2**. All other correction flag fields contain a value of **0**.

EDExpress prints a pound symbol (#) on the ISIR to the right of the field variable that was corrected on the most current transaction and prints an at symbol (@) to the right of the field variable that was corrected on a previous transaction.

Correction flags are cumulative (the flag is carried on all subsequent transactions).

On the ISIR, EDExpress does not actually print the data in this field. Rather, it uses this data to determine which fields have a pound symbol (#) or an at symbol (@) printed to the right of the field variable to show that the field has been corrected from the original application.

Printing Highlight Flags

Highlight flags on the ISIR (positions 2314 through 2508) indicate data that was highlighted in bold on the SAR, based on FAFSA data processed by the CPS. Refer to the Field Name and Position Cross-References table in the "Processing Codes" section. These fields are highlighted and provide a comparison between the SAR question number and ISIR field position.

Any position containing a value of **1** has a highlight flag set for the corresponding field. All other highlight flag fields contain a value of **0**.

On the ISIR, EDExpress prints the letter "h" to the left of the field title that was highlighted. If the field is both highlighted and assumed, an asterisk (*) is printed to the left of the field title instead of an *h*.

EDExpress does not actually print the data in this field. Rather, it uses this data to determine which ISIR fields should have an *h* printed to the left of the field title to show that the corresponding SAR field was highlighted.

Rejected ISIRs

Applications and corrections submitted to the CPS, regardless of the input type or source, can be rejected for incomplete, illogical, or inconsistent data.

An EFC is not computed for a rejected application transaction. Transactions can be rejected for multiple reasons. Up to seven one-character or two-character Reject Reason Codes are carried on the ISIR in positions 1408 to 1421.

The reject reason codes and resolution in response to each reject reason are described in "Table of Reject Codes and How to Respond to Each" in the "Processing Codes" section.

Comments

Up to 20 three-digit numbers can appear on the ISIR, indicating which comments would appear on pages one and three of a SAR, and are listed in ISIR positions 2866 to 2925. Some comments contain critical information regarding the student's status. The comment text that is printed on the ISIR can be found in the *2021-2022 SAR Comment Codes and Text* document found on the IFAP Web site.

Note: As part of the 2008-2009 SAR redesign process, the decision was made to remove the text for comment codes 047, 050, 112, 149, 158, 159, 170, and 171 from the paper "SAR Comments" section on page 3 and instead to present the information from these comments as variable text in the appropriate section on the first page. Comment text for these comments are displayed on the Web only. Because the text for these comments was replaced with variable text on the SAR and SAR Acknowledgement, we do not display or print the text on an ISIR printed from the EDExpress for Windows software. Note, however, that the comment code numbers are included in the ISIR file and are displayed in the "FAA Information" section of the printed ISIR. Schools using EDExpress still have the ability to query their databases using these comment code numbers.

National Student Loan Data System (NSLDS) Page

The ISIR contains NSLDS information. EDExpress stores only the most recent NSLDS transaction. As a result, when the ISIR is printed from EDExpress, the transaction number for the student's NSLDS record may not match the transaction number of the ISIR being printed. You should always print the NSLDS information with the highest transaction number, regardless of the transaction number of the ISIR being printed.

New for 2021-2022: The NSLDS information on the ISIR will now print in landscape layout.

Field Types

Fields can contain one of three types of data: character, numeric (N), or signed numeric (S/N). A content of all nines in a field indicates that the reported or calculated value is greater than or equal to the value of all nines. Blanks are allowable in some N and S/N fields.

With S/N fields, the sign is always implied in the right-most character of the field. For example, if the Student's Adjusted Gross Income field contains a value of negative 3507, it would appear as 000350P. The following chart explains the conversion of the sign and the number:

Signed Numeric Fields:

	0	1	2	3	4	5	6	7	8	9
Positive Values	{	A	B	C	D	E	F	G	H	I
Negative Values	}	J	K	L	M	N	O	P	Q	R

Note: All signed fields are printed with an extra byte.

Other Field Notes

When the Student Is Selected for Verification field in position 2962 on the ISIR layout is filled, EDExpress prints the value. If the value contains a **Y**, then an asterisk (*) is printed next to the EFC.

Additionally, EDExpress does not print the value in the Electronic Federal School Code Indicator field in position 2941. Instead, it prints the Federal School Code number associated with the value. For example, if the Electronic Federal School Code Indicator equals **3**, EDExpress prints the value for the Federal School Code #3 field found in positions 986 to 991. If you are a school or servicer, this field will always be blank.

If you are the student, by signing this application you certify that you (1) will use
federal and/or state student financial aid only to pay the cost of attending an
institution of higher education, (2) are not in default on a federal student loan or
have made satisfactory arrangements to repay it, (3) do not owe money back on a
federal student grant or have made satisfactory arrangements to repay it,(4) will
notify your college if you default on a federal student loan, and (5) will not receive
a Federal Pell Grant from more than one college for the same period of time.

If you are the parent or the student, by signing this application you certify that all
of the information you provided is true and complete to the best of your knowledge and
you agree, if asked, to provide information that will verify the accuracy of your
completed form. This information may include U.S. or state income tax forms that you
filed or are required to file. Also, you certify that you understand that the Secretary
of Education has the authority to verify information reported on this application with
the Internal Revenue Service and other federal agencies. If you electronically sign any
document related to the federal student aid programs using an FSA ID (username
and password)and/or any other credential, you certify that you are the person identified
by that username and password, and/or other credential, and have not disclosed
that username and password, and/or other credential to anyone else. If you purposely give
false or misleading information, you may be fined up to $20,000, sent to prison, or both.

Everyone whose information is given on this form should sign below. The student (and
at least one parent, if parent information is given) MUST sign below.
